

PRESS RELEASE

New Smart Card Management Tool from Versatile Security

Smart card management just got easier. Now the world's most efficient smart card management tool for smaller smart card projects, vSEC:CMS K-Series, is getting a major update: check out vSEC:CMS K1.1!

Stockholm, Sweden, May 23rd, 2012 – Versatile Security Sweden AB announces the release of [vSEC:CMS K-Series](#) version 1.1. New features in this version include: updated graphical user interface, batch processing capabilities for all operations, new activation code handling to enable license sales by resellers and new management operations for smart cards with: Fingerprint/BIO access control, Multiple PINs and PUCs (PIN Unlock Code).

“Most projects, even large national programs, start small. The vSEC:CMS K-Series makes it a breeze to get started with your smart card project instantly. It is also simple to upgrade the product to the more advanced system, vSEC:CMS T-Series, once the project grows and more features may be needed. Apart from all the new and cool technical features that have been added to this version, a new sales channel has also been enabled. Now Versatile Security's resellers will have the capability to resell this entry level smart card management system, which will be a great vehicle for them to get the smart card projects started.” said Per-Anders Fjärdsäter, CEO and President at Versatile Security.

“This version of K-Series is the best smart card tool I've ever worked with. I believe it will become the standard tool for most enterprise security smart card experts working with minidriver enabled smart cards all around the world. I am very happy that we've managed to keep the software free in tool mode, so everyone can try it and use it with their smart cards,” said Joakim Thorén, CTO at Versatile Security.

About Versatile Security

[Versatile Security](#) is a leading IT solutions provider in the identity and access management space with focus on easy deployment of smart cards with innovative smart card management systems. The company's customers are typically organizations that demand high security and ease of use. State of the art solutions enable the customers to securely authenticate, issue and manage user credentials, such as smart cards, more cost efficiently than other solutions on the market.

Versatile Security's mission is to provide solutions that are affordable and easy to integrate, thus allowing organizations of all sizes to implement high levels of security. First class support, maintenance, and training is also offered. Customers include: HSBC, Tieto, Centric, Raiffeisenbank, TradeRiver, European Commission, Svensk Exportkredit and IKEA.

The products and services can be bought and delivered worldwide by use of an extensive reseller network and through the Versatile Security web site: <http://versatilesecurity.com>
