ISSP deploys vSEC:CMS T-Series S-Edition

ISSP selects vSEC:CMS from Versatile Security as the administration and management system for the organization's smart cards.

Stockholm, Sweden, August 13th, 2012 – Versatile Security Sweden AB announces the successful [implementation](#) of the smart card management system vSEC:CMS T-Series S-Edition at ISSP.

“As a professional company extremely focused on information security, we are keen to implement efficient and innovative solutions to secure our own IT environment. That's why we implemented the vSEC:CMS – a very innovative solution which allows us to perform daily operations of smart card management processes with optimal time and HR consumption. Based on personal experience I can say that the vSEC:CMS enables us to carry out the maximum benefits from our smart card infrastructure. Now we can use PKI security which has no compromise with manageability and ease of use!” said Roman Sologub, General Manager at ISSP.

“Versatile Security is delighted about ISSP deploying our smart card management system, vSEC:CMS. This is the first deployment of our flagship CMS application in the Ukraine, a region we are very excited about and expect considerable growth in the next 12 months. Our company continues to work on keeping our position as the most innovative provider of SCMS's, where quick integration, user friendliness and low TCO are some of the key advantages for us.” said Per-Anders Fjärdsäter, CEO at Versatile Security.
