New Smart Card Tool from Versatile Security: vSEC:CMS U2.4

*Platform independent and free smart card tool for basic smart card operations now available!
Check out the vSEC:CMS U-Series 2.4 now!*

Stockholm, Sweden, September 11, 2012 – Versatile Security Sweden AB announces the release of [vSEC:CMS U-Series](#) version 2.4. New features in this version include the functionality to allow smart card users to perform smart card unlock using a Personal Unlock Code, commonly referred to as PUC and internationalization support for Russian.

“Since we started Versatile Security it has been our strategy to provide smart card tools for free to assist and promote enterprise smart card usage. Many thousands of smart card users and IT security experts have downloaded our vSEC:CMS products and it has created a fantastic communication channel to our current and future customers. I am especially happy with this version of U-Series, its wizard based processes really makes smart card operations as easy as we’ve always wanted them to be.” said Joakim Thorén, CTO at Versatile Security.

About Versatile Security

[Versatile Security](#) is a leading IT solutions provider in the identity and access management space with focus on easy deployment of smart cards with innovative smart card management systems. The company’s customers are typically organizations that demand high security and ease of use. State of the art solutions enable the customers to securely authenticate, issue and manage user credentials, such as smart cards, more cost efficiently than other solutions on the market.

Versatile Security’s mission is to provide solutions that are affordable and easy to integrate, thus allowing organizations of all sizes to implement high levels of security. First class support, maintenance, and training is also offered. Customers include: HSBC, Tieto, Centric, Raiffeisenbank, TradeRiver, European Commission, SEK and IKEA.

The products and services can be bought and delivered worldwide by use of an extensive reseller network and through the Versatile Security web site: <http://versatilesecurity.com>
