vSEC:CMS T-Series Version 3.1

The first true off the shelf smart card management system just got even better at administrating smart cards throughout the complete smart card lifecycle.

Stockholm, Sweden, July 31st, 2013 – Versatile Security Sweden AB announces that [vSEC:CMS T-Series version 3.1](#) is officially released. The new version includes a long list of new and improved features. The new features will help smart card administrators better manage user smart cards. New features include:

- RFID encoding
- Data export (SQL database)
- Data import (CSV)
- Windows 8 Virtual Smart Cards Management
- Barcode support on card printing
- Unicode support
- Built-in demo Directory and CA
- Support for HID Fargo HDP 5000 Printer
- Support of IDBridge K3000 as Operator Token
- Windows credential login to SQL server
- Integration with Johnson Control P2000 (physical access control system)
- Additional smart card types supported. See the [list of supported smart cards here](#)

“I am really happy with how this new version of vSEC:CMS T-Series turned out. It was supposed to be a point release with some minor corrections, and it turned out to be a huge leap forward with powerful features for large projects as well as really cool new demo capabilities in our evaluation packages,” said Joakim Thorén, CEO, Versatile Security.
