vSEC:CMS T-Series Version 3.2

The next generation smart card management system. vSEC:CMS, was just released by Versatile Security. The system that is ranked number one in administration of the complete smart card lifecycle - just got even better!

Stockholm, Sweden, December 16th, 2013 – Versatile Security Sweden AB announces that [vSEC:CMS T-Series version 3.2](#) is officially released. The new version includes a long list of new and improved features. The new features will help smart card administrators better manage user smart cards. New features include:

- User self-service capabilities for the most important operations
- Photo capturing during the issuance process
- Repository reporting capabilities
- HTML formatted email notifications
- System health information
- New operator user interface
- Additional smart card types supported. See the [list of supported smart cards here](#)

“We are very excited about the new version of vSEC:CMS that integrates photo capturing. This feature provides an easy means to enroll users and to deliver corporate badges to Executives. It is a perfect fit with the use cases of the Gemalto Protiva ExecProtect solution,” said Pierre Lartigue, Solution Marketing, Gemalto.

“Even though the length of the new feature list is not a record for this product, T3.2 feels like a huge leap forward,” said Joakim Thorén, CEO, Versatile Security. “The user self-service capabilities are spot-on and slots into the enterprise environment smoothly. The general user interface makeover really improves operational efficiency.”
