

Versatile Security Releases vSEC:CMS T-Series Version 3.3

Versatile Security announces the release of version 3.3 of its flagship product vSEC:CMS T-Series –the market leading security device management software.

Stockholm, Sweden, April 28th, 2014 – Versatile Security Sweden AB announces the release of vSEC:CMS T-Series version 3.3. The new version includes several important new features, the most prominent being:

- Key archival/recovery for user smart card keys
- Smart card self-issuance from user self-service
- vSEC:CMS Plugin API to extend and customize workflows
- Enrollment agent certificate handling

To learn more about lifecycle management of security devices such as smart cards and to download the evaluation version of vSEC:CMS T-Series, visit Versatile Security online at:

“I’m very excited about version 3.3 and the new opportunities it brings. Self-service issuance and key archival/recovery are key features that have been strongly requested by our larger customers in Europe and the Middle East. This version will drastically simplify the smart card deployment by removing the operator involvement during the issuance process and optimize operational efficiency. With all the new features and still the usual key selling points, vSEC:CMS T-Series confirms its worldwide leading position in smart card management,” said William Houry, Vice President of Sales, Versatile Security.

“We’re very proud of this new version of vSEC:CMS T-Series, the team got the chance to do a lot more extensive beta testing and also non-functional testing, this shows in the quality of the finished product. On top of that I believe our current and future customers will really enjoy all the smart new features we managed to get into this version,” said Joakim Thorén, CEO, Versatile Security.

About Versatile Security

Versatile Security is a leading IT solutions provider in the identity and access management space with focus on easy deployment of smart cards with innovative smart card management systems. Our customers are organizations that demand high security and ease of use. Our state of the art solutions enable our customers to securely authenticate, issue and manage user credentials, such as smart cards, more cost efficiently than other solutions on the market.

Our mission is to provide solutions that are affordable and easy to integrate, thus allowing organizations of all sizes to implement high levels of security. We also offer first class support, maintenance, and training. Our customers include: HSBC, Tieto, Raiffeisenbank, Hornbach, Daimler, Alstom, European Commission, Qualcomm, Saudi Aramco and Cleveland Clinic Abu Dhabi.

Our products and services can be bought and delivered worldwide by use of an extensive reseller network and through the Versatile Security web site: <http://versatilesecurity.com>
