

Versasec vSEC:CMS 4.5 Smart Card Lifecycle Management Solution Offers Remote Security Device Management, New Interfaces, and Yubikey Token Support

New Version Boasts Management Enhancements, Customizable Features

NEW YORK, June 30, 2016 – [Versasec](#), the leader in smart card management systems, today announced vSEC:CMS 4.5, the latest iteration of the company's flagship card management system. vSEC:CMS 4.5 allows for centralized management of virtual smart cards, supports new smart card types from 15 vendors, and supports additional client and server platforms.

Among its key features are its remote security device management (RDSM) capabilities, which enable centralized management for virtual smart cards. This version also supports Yubikey tokens from Yubico for personal identity verification (PIV) use cases.

This new version of vSEC:CMS also has these attributes:

- Allows Thales nShield hardware security module (HSM) to be used for card management system (CMS) master keys
- Supports additional SMS providers, including Certificall, Clickatell, Tyntec, Dolphin and others for mobile notifications
- Offers a customizable interface for setting up connections to external components such as PKIs, printers and databases
- Supports OpenTrust PKI 4.8.1
- Enables configuration of smart card access by smart card type.

"With hackers being thwarted more and more at large enterprises, smaller, less well-protected companies are increasingly at risk," said Joakim Thorén, CEO of Versasec. "One of the smartest, easiest and most cost-effective actions companies of any size can do to combat attacks – both from inside and outside their organizations – is to adopt security measures such as multi-factor authentication through smart cards."

Additional smart card types are supported in this version including various cards from Gemalto, Microsoft, ACS, Avtor, Athena, Morpho, Oberthur, HID, Raak Technologies, Feitian, Safenet, Mifare, CardOS and others. Additional platforms supported by vSEC:CMS 4.5 include Microsoft Windows 7, 8, 10, 2008, 2012 (platform and operator) and Microsoft Windows 2008 and 2012 on the server side.

vSEC:CMS S-Series 4.5 is available now for evaluation via download at [versasec.com](#).

About Versasec

[Versasec](#) is a leading IT solutions provider in the identity and access management space with focus on easy deployment of smart cards with innovative smart card management systems. Our customers are organizations that demand high security and ease of use. Our state of the art solutions enable our customers to securely authenticate, issue and manage user credentials, such as smart cards, more cost efficiently than other solutions on the market.

Our mission is to provide solutions that are affordable and easy to integrate, thus allowing organizations of all sizes to implement high levels of security. We also offer first class support, maintenance, and training. Our customers include: Cleveland Clinic Abu Dhabi, Tieto, Raiffeisenbank, Hornbach, Daimler, European Commission, Qualcomm, eBay, Saudi Aramco, IMF and L'Oreal.

Our products and services can be bought and delivered worldwide by use of an extensive reseller network and through the Versasec web site: <https://versasec.com>
