

FOR IMMEDIATE RELEASE

Versasec, DigiCert Establish Formal Working Relationship

Government, Manufacturing, Healthcare and Other Joint Customers Requiring Advanced Authentication Solutions to See Significant Benefits

NEW YORK and LEHI, UTAH, November 16, 2016 –Versasec, the leader in smart card management systems, and DigiCert, a global leader in trusted identity and authentication services for enterprise web and Internet of Things (IoT) security, today announced their formalized working relationship that will benefit the security needs of customers and prospects in industries including government and healthcare.

As part of their agreement, each company will work with its reseller partners to ensure they can support products from both Versasec and DigiCert.

Versasec is the creator of the vSEC:CMS smart card management system. vSEC:CMS provides all the software tools to easily administer and manage identity access management smart cards securely and conveniently. The Versasec product suite consists of products that meet any organization's requirements for managing smart cards.

DigiCert provides trusted identity solutions for scalable web and Internet of Things security with authentication, encryption, and digital signing for SMBs and large enterprises, including many of the world's biggest brands. The company offers an award-winning certificate lifecycle management platform, with automation that accommodates high-volume digital certificate deployments and simplifies all stages of the certificate lifecycle. DigiCert combines in-house expertise and a multi-functional platform to help organizations of any size build a custom, effective security infrastructure.

“Emerging technologies have the opportunity to improve our lives with enhanced connectivity, but they also can be exploited by attackers if industries do not work together to provide authentication and to secure connections.” said DigiCert CTO Dan Timpson. “Our work with Versasec allows us to enhance our security solutions with a focus on scalable authentication, encryption and digital signing for our joint customers and across all industries.”

“With strong cooperation between our organizations, we’ve optimized vSEC:CMS to work seamlessly with DigiCert’s broad range of solutions, providing exceptional security and value to our joint customers in government agencies, manufacturing, healthcare and more,” said Joakim Thorén, CEO of Versasec.

For users of DigiCert solutions, the benefits of implementing Versasec’s vSEC:CMS include the following:

- Fast implementation that takes minutes, rather than weeks or months
- An intuitive user interface that improves operational efficiency

- No hidden costs and a low total cost of ownership
- Consistently high security level without exception
- Large-scale capabilities, available from day one
- Easy integration with the customer's ecosystem
- Customization options

For users of Versasec's vSEC:CMS identity and access management (IAM) solution, the benefits of implementing solutions from DigiCert include the following:

- User Authentication Personal ID Services for Enterprise Customers
- Personal ID user authentication certificates through Managed PKI accounts
- Ability to fine-tune client certificate management with a feature-rich interface
