

FOR IMMEDIATE RELEASE

Versasec Intros Latest Version of vSEC:CMS S-Series

With Version 4.8, Smart Card Management Leader Adds Strong Focus on User Side of Managing Security Credentials with Self-Service Improvements

NEW YORK, April 17, 2017 -- [Versasec](https://www.versasec.com), the leader in smart card management systems, today introduced version 4.8 of its vSEC:CMS S-Series identity and access management solution. This updated version of the company's flagship product includes a variety of performance improvements around user self-service, among other features.

Versasec vSEC:CMS S-Series version 4.8 addresses the user side of managing security credentials with several new and interesting features in the vSEC:CMS User Self-Service application, including new capabilities for remote security device management.

Versasec's R&D team has made additional significant improvements to vSEC:CMS S-Series Version 4.8:

- By using the vSEC:CMS User Self-Service Credential Provider, Versasec has made it possible now to issue credentials from the MS Windows logon screen
- The vSEC:CMS User Self-Service application now includes support for customized dialog and error messages
- Using the vSEC:CMS user notification system, users can now receive enhanced system notifications for smart card expirations
- The vSEC:CMS User Self-Service now offers enforcement for server-managed PIN policies
- Improvements have been made to the retire procedure for managed security devices (RSDM) including remote destruction of possible Virtual Smart Cards on such devices
- The vSEC:CMS server repository will allow for synchronization of security device information (RSDM)

"Our teams work diligently every day, listening to the needs of our customers and acting upon them," said Joakim Thorén, Versasec CEO. "With vSEC:CMS 4.8, we've made system enhancements that truly benefit the end users, while improving performance for all customers across the board, and ensuring the ability of companies of all sizes to securely manage their remote security devices. These improvements make our strong authentication management tools even stronger and easier to use."

Users can download an evaluation copy of vSEC:CMS S-Series Version 4.8 now by visiting the Versasec web site at <https://versasec.com>

About Versasec

Versasec is a leading IT solutions provider in the identity and access management space with focus on easy deployment of smart cards with innovative smart card management systems.
