

Versasec is a specialized business and global leader in Credential Management Systems (CMS), enabling agencies and enterprises to seamlessly transition to phishing-resistant authentication. Our platforms (vSEC:CMS and vSEC:CLOUD) offer a centralized, comprehensive interface for the end-to-end lifecycle management of hardware-bound passkeys. Specifically, technologies such as PKI, FIDO2, Physical Smart Cards, and Windows Hello for Business (WHfB).

Core Competencies

Unified Credential & MFA Management

A comprehensive CMS providing end-to-end lifecycle control, from secure issuance to revocation, with support for simultaneous management via a single administrative console.

PKI Devices

Seamless integration with all major Certificate Authorities to automate, enforce, and secure digital certificate lifecycles.

FIDO Devices

Bridge traditional PKI with modern passwordless authentication. Deploy granular control over FIDO2 credentials to seamlessly achieve Zero Trust and phishing-resistant compliance.

Differentiators

Vendor-Agnostic Interoperability

Eliminate vendor lock-in through seamless, out-of-the-box integration with leading Certificate Authorities (CAs), Hardware Security Modules (HSMs), and a diverse array of credential types, including physical smart cards, hardware tokens, and virtual credentials, supported by industry leaders such as Yubico, Swissbit, Thales, HID, Idemia, and Taglio.

Rapid Deployment & Migration

Off-the-shelf readiness ensures deployment in days, not months.

Scalability

Proven to scale effortlessly from small pilots to enterprise deployments exceeding 300,000+ credentials.

Past Performance

Sandia National Laboratories

Successfully replaced an end-of-life Microsoft MIM/FIM system, modernizing credential management for over 25,000 users in a highly secure research environment.

Federal Government: FDIC

Proven ability to meet the rigorous security, compliance, and multi-factor authentication (MFA) requirements of a major U.S. federal agency.

Global Financial Institutions

Implemented comprehensive PKI systems for organizations like Poštanska Štedionica and the Swedish Export Credit Corporation to secure high-stakes digital banking and internal operations.

Corporate Data

UEI: JSE7JX2TJDM4 | CAGE Code: 8E6A1

Primary NAICS: 513210, 423430

Certifications: SSF 1101 Cybersecurity, FSQS-NL certificate, GSA Listed, Member of Microsoft Intelligent Security Association (MISA), Member of the FIDO Alliance, CISA Secure by Design, ISO 27001 Pending

Business Type: Small Business
